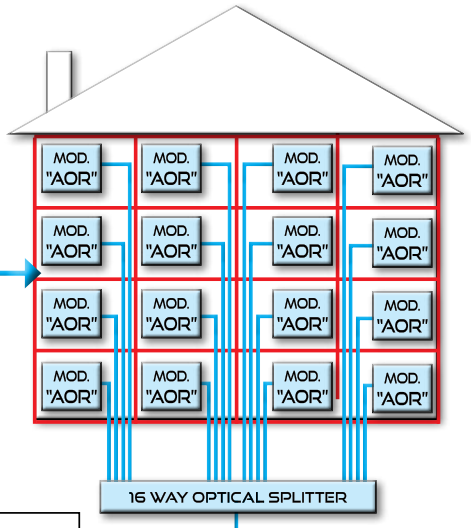
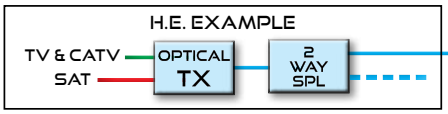
mod. AOT-STC 75 16 to 32 USERS FTTH (Fiber To The Home)
APARTMENT INSTALLATION EXAMPLE

The mod. "AOT-STC75" contain:

N. 1 mod. "AOR-STC75"
SAT–TV–CATV Automatic Optical Receiver module with Optical AGC





∗ PSU 12Vdc

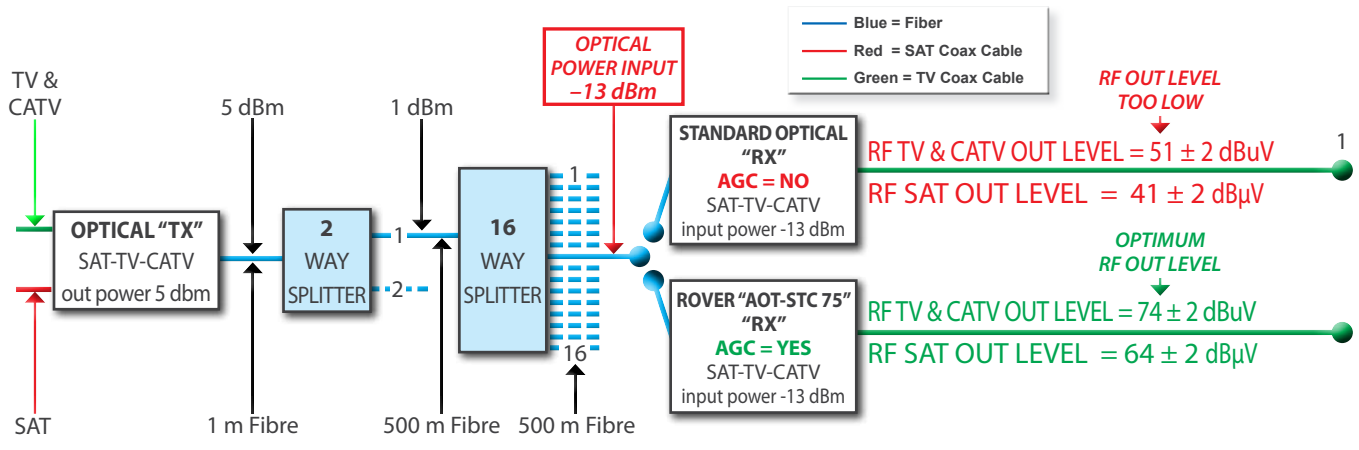
COAX RF OUT & 12 Vdc

OPTIC FIBER IN

∗ The Optical Receiver power supply may also come from the Set Top Box, via RF coax cable.

WHY IS "AGC" SO IMPORTANT IN THE OPTICAL RX?

AGC is important because 1 dB variation of the Received Optical Input Power can cause a 2 dB RF level output variation at the RX.



Example: Medium distance (1 to 5 Km) FTTH Fiber Optic distribution System for large Villas or Condominiums.
The Standard Optical "RX" without AGC, don't have enough RF level for one socket, while ROVER "AOT-STC75" Ultra Wide Range Optical RX with AGC, maintains the same RF output level of 75 dBuV, for all range of Optical Input power, without Saturation.
