

## 1 Welcome

Dear Users,

Rover Instruments is pleased to welcome you as one of our many customers in 105 countries worldwide, from **A**fghanistan to **Z**imbabwe.

As you can see we are renewing our website and would like to receive your suggestions in order to carry out improvements and, at the same time, make our website easier to use.

To help you in your daily work, we thought you would be interested in receiving a link to download our popular brochure "**Understanding Digital TV**", written together with the Italian State Broadcasting company "RAI" and the Italian school for professionals "EUROSATELLITE". Click on the link to your right to download a preview copy.

We plan to periodically write **technical articles** for the world of digital TV, SAT-TER and CABLE, to explain how to measure and solve specific installation and reception problems. Click on the second link to your right to download an example.

May we remind you that you can cancel your subscription to our newsletter at any time **by clicking here**, or if you prefer to receive it at another email address, please send us an email to: [newsletter@roverinstruments.com](mailto:newsletter@roverinstruments.com).

**Best wishes to you all from Rover Instruments!**
